

Model Railroads

Mu-Cla was originally used by the creator for scenery in model railroading, while looking for a substance with these qualities:

- Easy to use
- Works with Armatures
- Working time of hours
- Drying hard yet flexible
- Crack resistant

Suddenly, realistic dioramas and landscapes were flowing from Dale's workshop with ease and exciting quality.

As the only product Dale enjoyed to use while creating model railroad scenery, Mu-Cla was born. Since then Mu-Cla has won "Best New Product for Diorama" from iHobby Expo and enjoyed ample sales due to it's exciting properties and wide range of use.

Model railroaders will save time while enjoying their results.
